

A close-up photograph of a Gühring SC-TM-Z SP thread milling cutter. The cutter is a golden-colored, multi-fluted tool with a complex, multi-fluted design. It is positioned vertically, with its tip just above a circular hole in a dark, metallic workpiece. The background is a blurred industrial setting. The Gühring logo is visible in the top right corner.

GÜHRING

SC-TM-Z SP

High-performance thread milling cutter with full profile

SC-Line thread milling cutter
SC-TM-Z SP

Thread milling at the limits

Economical & process-reliable
thread milling up to 2.5xD
thread depth

The high-performance full-profile thread milling cutter
produces the complete thread in two revolutions.

Thanks to its new flute geometry, vibrations are success-
fully suppressed, which enables higher cutting parameters
to be achieved. Users benefit from significantly shorter
machining times and high thread quality. Thanks to its
outstanding wear resistance, the thread milling cutter can
produce true-to-gauge for longer. Tool radius correction
therefore is not needed until much later on.

- x 55 % reduction in **machining time** per thread
- x **Tool life** increased by 17 %

- x Excellent running smoothness and surface quality thanks to patent-pending flute geometry
- x New milling strategy & short machining time reduce cost per thread
- x High process reliability with maximum tool life up to 2.5xD thread depth
- x Reduced radial load

New flute geometry with uneven division
and uneven spiralling suppresses vibrations

Irregular tooth rows reduce radial forces
and improve dimensional accuracy and process reliability

Optimum combination of **carbide, Sirius coating**
and **tool geometry** ensures maximum wear resistance

Application example

Component:	Bearing block St-52, 1,0570, thread depth 20 mm	
Tool:	#4870, M10x(1.5) 2.5xD with internal cooling	
Customer target:	Machining times reduced at thread depth of max. 2.5xD	
Difficulty:	Increased cost-effectiveness compared to competitors' tools	
Cutting data:	Gühring	Competitor
	v_c 120 m/min	v_c 110 m/min
	f_z 0.075 mm/z	f_z 0.055 mm/z
	Counter rotation 2/3-1/3	Counter rotation 2/3-1/3
Tool life:	820 parts	700 parts

Thread milling cutters without chamfer for ISO metric threads

Cutting data

CNC Gühro ThreadMill

FIND THE OPTIMAL CNC PROGRAMME

FOR YOUR THREAD MILLING CUTTER

To the optimal CNC programme in five steps

- 1. Specify the thread data**
select from all current thread standards
- 2. Select the material**
you are always referred to the optimal parameters
- 3. Select the tool**
technical data, drawing, machining time and
video simplify selection
- 4. Record CNC data**
enter required milling strategy and parameters
- 5. Receive CNC programme with code and data sheet**
programming data (Sinumerik, Haidenhain, Fanuc, Philips,
Mazatrol or Hurco) are imported and automatically recognised
